## PRESS RELEASE

On Friday, January 8, 2021, at 15.05, an incident occurred at the level of the interconnected European electric transmission network, which led to the triggering of several equipments from the electric transmission networks both in Romania and in other countries. At the level of Romania, the northwestern part of the country was affected.

The Electric Transmission Network in Romania was restored to normal operating conditions around 16.00, all affected consumers being restored around 16.45.

The causes and conditions in which this incident occurred are to be analyzed and identified at the level of the Association of Transport and System Operators in Europe - ENTSO-E.
